

TABLE OF CONTENTS
ADDITIONAL ONLY ON THE CD

MATHEMATICS	MECHANICS AND STRENGTH OF MATERIALS
2772 Trig and Involute Functions	2930 Balancing Rotating Parts
2772 0 Degrees	2930 Static and Dynamic Balancing
2777 5 Degrees	2930 Balancing Calculations
2782 10 Degrees	2931 Masses in Same Plane
2787 15 Degrees	2933 Masses in Two or More Planes
2792 20 Degrees	2934 Balancing Lathe Fixtures
2797 25 Degrees	2935 Running Balance
2802 30 Degrees	2936 Classification
2807 35 Degrees	2937 Energy by Velocity
2812 40 Degrees	2937 Flywheel Design
2816 45 Degrees	2938 Presses, Punches and Shears
2817 Constants for Sine-Bars	2939 Dimensions of Flywheels
2817 2.5-inch Sine-Bar	2940 Simplified Flywheel Calculations
2824 3-inch Sine-Bar	2941 Centrifugal Stresses in Flywheels
2831 5-inch Sine-Bar	2942 Combined Stresses in Flywheels
2838 10-inch Sine-Bar	2942 Thickness of Flywheel Rims
2845 75-mm Sine-Bar	2943 Safety Factors
2852 125-mm Sine-Bar	2943 Safe Rim Speeds
2859 Squares of Numbers	2944 Safe Rotation Speeds
2859 Numbers from 1 to 999	2945 Bursting Speeds
2861 Mixed Numbers from 1/64 to 12	2946 Stresses in Rotating Disks
2863 Squares and Cubes of Fractions	2946 Steam Engine Flywheels
From 1/32 to 100	2947 Spokes or Arms of Flywheels
2869 Fractions of Pi (π)	
2870 Powers, Roots, and Reciprocals	PROPERTIES, TREATMENT, AND TESTING OF MATERIALS
2870 From 1 to 200	2948 Properties of Materials
2874 From 201 to 400	2948 Copper-Clad Steel
2878 From 401 to 600	2948 Truflex
2882 From 601 to 800	2948 Firebrick Properties
2886 From 801 to 1000	2948 Inconel
2890 From 1001 to 1500	2948 Inconel "X"
2900 From 1501 to 2000	2949 Lodestone
2910 Multiplication Tables for Fractions	2949 Metallography
2910 Fractions and Whole Numbers	2950 Micarta
2911 Common Fractions	2950 Monel
2913 Area and Volume of Spheres	2950 "R" Monel
From 1/64 to 200	2950 "K" Monel
2916 Circumference and Area of Circles	2951 "KR" Monel
From 1/64 to 999	2951 "S" Monel
2928 Decimal Equivalents, Squares,	2951 "H" Monel
Cubes, Roots, & Logarithms of	2951 Nichrome
Fractions	2952 Nickel Alloy for Resisting Acids
2929 Curves	2952 Duronze
2929 Catenary Curve	

TABLE OF CONTENTS
ADDITIONAL ONLY ON THE CD

PROPERTIES, TREATMENT, AND TESTING OF MATERIALS

(Continued)

2952	Aluminum Alloys, Wrought, Sheet
2952	Plow-steel Wire Rope
2953	Type Metal
2953	Vanadium Steel
2953	Wood's Metal
2953	Lumber
2954	Lumber, Manufactured
2954	Lumber Water Content
2954	Pressure and Flow of Water
2954	Water Pressure
2956	Flow of Water in Pipes
2957	Friction Loss
2958	Flow through Nozzle
2960	Buoyancy
2960	Properties of Air
2961	Volumes and Weights
2962	Density of Air
2963	Expansion and Compression
2965	Horsepower Required to Compress Air
2965	Continuity Equation
2969	Flow of Air in Pipes
2969	Flow of Compressed Air in Pipes

DIMENSIONING, GAGING, AND MEASURING

2971	Symbols For Drafting
2971	Air Conditioning Symbols
2972	Heating and Ventilation Symbols
2973	Valve Symbols
2974	Piping Symbols
2975	Pipe Fittings Symbols
2976	Dimensioning, Gaging, and Measuring
2976	Transfer Calipers
2976	Wheatstone Bridge

TOOLING AND TOOL MAKING

2978	Jig Bushings
2978	Materials
	Press Fit Wearing Bushings
2979	Head Type
2980	Headless Type
2982	Specifications

TOOLING AND TOOL MAKING

(Continued)

	Renewable Wearing Bushings
2982	Slip Type
2984	Fixed Type
2985	Headless Type Liner Bushings
2987	Locking Mechanisms
2988	Jig Bushing Definitions
2988	Jig Plate Thickness
2988	Jig Bushing Designation System
2988	Jig Boring
2988	Definition of Jig and Fixture
2988	Jig Borers
2989	Jig-Boring Practice
2990	Transfer of Tolerances
2992	Determining Hole Coordinates
2992	Coordinate Dimension Factors
2994	Spacing Off Circumferences
2996	Hole Coordinate Tables
3008	Gage Blocks
3008	Precision Gage Blocks
3009	Gage Block Sets, Inch
3010	Gage Block Sets, Metric
3011	Miscellaneous Topics
3011	Rotary Files and Burs
3011	Tooth-rest for Cutter Grinding

MACHINING OPERATIONS

3012	Control Systems
3013	Control Motor Types
3015	Controllers
3015	Control Function
3016	Electromechanical Control Systems
3016	Mechanical Stiffness
3017	Torsional Vibration
3017	Electric Motors
3018	Stepper Motors
3018	Gearing
3019	Feedback Transducers
3020	Analog Transducers
3020	Synchros and Resolvers
3020	Hydraulic and Pneumatic Systems
3021	Hydraulic Pumps
3021	Hydraulic Fluids
3024	Proportional Control Systems
3025	Electronic Controls
3025	Pneumatic Systems

TABLE OF CONTENTS
ADDITIONAL ONLY ON THE CD

MACHINING OPERATIONS

(Continued)

3026	Machining Operations
3026	Feed Rate on Machine Tools
3027	Billet
3027	Milling Machines, Lincoln Type
3027	Saddle
3027	Cold Extrusion
3028	Transfer Machines
3028	Numerical Control
3028	Introduction
3029	CNC Technology
3029	Numerical Control vs. Manual Operations
3030	Numerical Control Standards
3033	Programmable Controller
3037	Closed-Loop System
3037	Open-Loop System
3037	Adaptive Control
3038	Flexible Manufacturing Systems
3039	Flexible Manufacturing Cell
3039	Flexible Manufacturing Module
3039	Programming
3042	Postprocessors
3043	G-Code Programming
3043	Format Classification
3043	Letter Addresses
3045	Sequence Number (N-Word)
3045	Preparatory Word (G-Word)
3049	Miscellaneous Functions
3050	Feed Function (F-Word)
3051	Spindle Function (S-Word)
3051	Tool Function (T-Word)
3053	Linear Interpolation
3054	Circular Interpolation
3055	Helical and Parabolic Interpolation
3056	Subroutine
3058	Conditional Expressions
3058	Fixed (Canned) Cycles
3062	Turning Cycles
3062	Thread Cutting
3063	APT Programming
3065	APT Computational Statements
3065	APT Geometry Statements
3066	Points, Lines and Circles
3070	APT Motion Statements
3071	Contouring Cutter Movements
3072	Circles and Planes
3074	3-D Geometry

MACHINING OPERATIONS

(Continued)

3075	APT Postprocessor Statements
3077	APT Example Program
3078	APT for Turning
3080	CAD/CAM
3083	Drawing Projections
3084	Drawing Tips and Traps
3087	Sizes of Lettering on Drawing
3088	Drawing Exchange Standards
3089	Rapid Automated Prototyping
3090	DNC
3090	Machinery Noise
3090	Measuring Machinery Noise

MANUFACTURING PROCESS

3092	Punches and Dies
3092	Clearance
3093	Lubricants for Press Work
3093	Annealing Drawn Shells
3093	Drawing Rectangular Shapes
3093	Speeds and Pressures for Presses
3094	Pressure Required for Punching
3094	Shut Height of Press
3094	Drawn Shells
3094	Diameters of Shell Blanks
3096	Drawn Cylindrical Shells
3097	Depth and Diameter Reductions
3098	Sheet Metal
3098	Lengths of Straight Stock
3102	Other Bending Allowance Formulas
3102	Joining and Edging
3107	Fine Blanking
3109	Forge Shop Equipment
3109	Blacksmiths' Anvils
3109	Setting the Anvil
3109	Steam Hammer Rating
3109	Capacity of Steam Hammers
3109	Power for Operating Steam Hammers
3110	Board Drop-hammers
3111	Forging Presses
3112	Air Pressures and Pipe Sizes for Forges
3112	The Cold Swaging Process
3113	Forging Machines
3113	Dies for Bolt and Rivet Forging Machines

TABLE OF CONTENTS
ADDITIONAL ONLY ON THE CD

MANUFACTURING PROCESS	
<i>(Continued)</i>	
3113	Dies and Tools Used in Hot-pressed Center-feed Nut Machines
3113	Bulldozer Dies
3113	Helve Hammers
3113	Vertical Power Hammers
3113	Efficiency of Forging Hammers
3115	Machinery and Hammer Foundations
3115	Concrete Foundations
3116	Drop Hammer Foundations
3116	Foundation for Steam Hammer
3116	Machine and Forge Shop Floor Materials
3116	Concrete and Wooden Floors
3117	To Prevent Dust on Concrete Floors
3117	Floors for Forge Shops
3118	Drop-Forging Dies
3118	Steel for Drop-forging Dies
3118	Allowance for Shrinkage
3118	Draft Allowance
3118	Locating Impression in the Die
3118	Obtaining Weight of Forging from Lead Proof
3119	Amount of Flash for Drop-forging Dies
3119	The Break-down of Drop-forging Dies
3119	Hardening Drop-forging Dies
3119	Heating the Die
3119	Cooling the Heated Die
3120	Tempering Dies
3120	Dies for Bronze and Copper Forgings
3120	Trimming Dies for Drop-forgings
3120	Standard Tolerances for Forgings
3123	Welding Methods
3123	Classes of Welds
3123	Welding Heat
3123	Fire for Welding
3123	Fluxes for Welding
3124	Fuels for Forge
3124	Machine Welding
3125	Hydraulic Press
3125	Rules and Formulas for Hydraulic Press Calculations

MANUFACTURING PROCESS	
<i>(Continued)</i>	
3127	Welding with Thermit
3127	Thermit Process
3127	Preparation of Part to be Welded
3127	Mold for Thermit Welding
3128	Thermit Required for Welding
3128	Thermit Additions
3128	Pre-heating — Making a Weld
3129	Filling Shrinkage Holes and Surface Flaws
3129	Composition of Thermit Steel
3129	High- and Low-pressure Torches
3129	Coloring Metals
3129	General Requirements in the Coloring of Metal Surfaces
3130	Cleaning Metals for Coloring
3130	Pickling Solutions or Dips for Coloring
3130	Coloring Brass
3130	To Produce a Rich Gold Color
3130	White Colors or Coatings
3131	Silvering
3131	To Give Brass a Green Tint
3131	Blackening Brass
3131	Preservation of Color
3131	Niter Process of Bluing Steel
3131	Bluing Steel by Heat-treatment
3132	Blue-black Finish
3132	Black Finish
3132	Gun Metal Finish
3133	Browning Iron and Steel
3133	To Produce a Bronze Color
3133	To Produce a Gray Color
3133	Mottled Coloring
3133	Coppering Solution
3133	White Coatings for Laying Out Lines
3133	To Produce Gray Colors
3133	Blue and Violet Shades
3133	To Give Brass a Green Tint
3134	Etching And Etching Fluids
3134	Etching Fluids for Different Metals
3134	Etching Brass Nameplates
3135	Producing a Black Background
3135	Etching Ornamental Designs in Metal

TABLE OF CONTENTS
ADDITIONAL ONLY ON THE CD

FASTENERS

- 3137 Fasteners
- 3137 Stove Bolt
- 3137 Flattening Test
- 3137 Rivets, Cold Formed
- 3138 Expansion Bolt
- 3138 Washers

THREADS AND THREADING

- 3139 Threads and Threading
- 3139 History of Briggs Pipe Thread (NPT)
- 3140 Lock-Nut Pipe Thread
- 3140 Thread Grinding
- 3141 Hand Chaser
- 3141 Thread-Cutting Methods
- 3142 Taps

GEARS, SPLINES, AND CAMS

- 3144 Geometry Factors For Gear Teeth
- 3144 Contact and Bending Stresses
- 3144 Geometry Factors for Pitting Resistance and Bending Strength
- 3144 Exceptions to the Information Sheet Data and Procedures
- 3144 Basic Gear Geometry of Spur and Helical Gears
- 3146 Contact Ratios
- 3147 Minimum Lengths of Lines of Contact
- 3147 Load Sharing Ratio, mN
- 3147 Calculating the Pitting Resistance Geometry Factor, I
- 3148 Bending Strength Geometry Factor, J
- 3149 Pressure Angle at Load Application Point
- 3150 Generating-Rack Shift Coefficient
- 3151 Tables of Geometry Factors, I and J
- 3151 Using the Tables
- 3160 Power-Transmitting Capacity of Spur Gears
- 3160 Modes of Failure

GEARS, SPLINES, AND CAMS

(Continued)

- 3160 Strength Calculations for Spur and Helical Gears
- 3161 Rating Formulas
- 3161 Exceptions
- 3161 Additional Considerations
- 3162 Criteria for Gear Tooth Capacity
- 3162 Relationship of Pitting Resistance and Bending Strength Ratings
- 3163 Fundamental Rating Formulas
- 3163 Pitting Resistance
- 3164 Symbols Used in Gear Rating Equations
- 3166 Pitting Resistance Power Rating
- 3166 Contact Load Factor, K
- 3167 Bending Strength
- 3167 Allowable Bending Stress Number
- 3168 Bending Strength Power Rating
- 3168 Values for Factors Applied in Fundamental Equations
- 3168 Rim Thickness Factor KB
- 3168 Geometry Factors I and J
- 3168 Transmitted Tangential Load, Wt
- 3169 Dynamic Factors, Cv and Kd
- 3171 Application Factors, Ca and Ka
- 3171 Service Factors, CSF and KSF
- 3172 Elastic Coefficient, Cp
- 3172 Surface Condition Factor, Cf
- 3172 Size Factors, Cs and Ks
- 3172 Load Distribution Factors, Cm and Km
- 3174 Allowable Stress Numbers, Sac and Sat
- 3175 Case Depth of Surface-Hardened Gears
- 3176 Momentary Overloads
- 3176 Yield Strength
- 3176 Hardness Ratio Factor CH
- 3177 Life Factors CL and KL
- 3178 Localized Yielding
- 3178 Reliability Factors, CR and KR
- 3178 Temperature Factors CT and KT

TABLE OF CONTENTS

ADDITIONAL ONLY ON THE CD

GEARS, SPLINES, AND CAMS

(Continued)

3180	Worm Gearing
3180	Standard Design for Fine-pitch
3181	Formulas for Proportions of Wormgears
3182	Proportions of Fine-pitch Worms and Wormgears
3190	Materials for Worm Gearing
3190	Single-thread Worms
3190	Multi-thread Worms
3192	Ratio for Obtaining "Hunting Tooth" Action
3193	Pitch Diameter of Worm
3193	Addendum and Dedendum
3194	Outside Diameter of Wormgear
3194	Pressure Angles
3194	Designing Worm Gearing Relative to Center Distance and Ratio
3195	Efficiency of Worm Gearing
3199	Self-locking or Irreversible Worm Gearing
3199	Worm Gearing Operating Temperatures
3199	Thermal Rating
3200	Water and Forced-Air Cooling
3200	Double-enveloping Worm Gearing
3202	Worm Thread Cutting
3202	Wormgear Hobs
3203	Helical Fluted Hobs
3204	Gear Shaving

MACHINE ELEMENTS

3206	Cement
3206	Portland Cement
3206	Natural Cement
3207	Pozzuolanic or Slag Cement
3207	Concrete
3207	Concrete
3207	Concrete Mixtures
3207	Sand, Gravel, and Stone for Concrete
3207	Amount of Water for Mixing Concrete
3207	Reinforced Concrete
3208	Strength of Concrete
3208	Durability of Concrete in Sea Water

MACHINE ELEMENTS

(Continued)

3208	Waterproofing Concrete
3208	Resistance to Acids and Oils
3208	Lutes and Cements
3209	Water-proof Compositions
3209	Oil-proof Cements
3209	Acid-proof Cements
3209	Gasket Compositions
3210	Machinists Cements
3210	Leather Cements
3210	Iron and Stone Cements
3210	Cement Proof to Hydrocarbon Gases
3210	Cements Proof to Chlorine
3210	Elastic Cements
3211	General Purposes
3211	Marine Glue
3211	Acid-proof Lining
3211	Cements for Pipe Joints
3211	Adhesives
3211	Adhesives Bonding
3215	Sealants
3215	Sealants
3216	British Keys and Keyways
3216	Metric Keys and Keyways
3221	Preferred Lengths of Metric Keys
3222	Parallel Keys, Keyways, Keybars
3224	Taper Keys and Keyways
3226	Dimensions and Tolerances
3226	Woodruff Keys and Keyways
3228	Preferred Lengths of Plain and Gib-head Keys
3229	Wrought Steel Pipe
3230	Weights and Dimensions
3232	Properties of Schedule Pipe
3234	Volume of Flow
3235	Plastics Pipe
3235	Dimensions and Weights
3236	Properties and Uses
3238	Pipe and Tube Bending
3238	Definitions of Pipe Fittings

TABLE OF CONTENTS
ADDITIONAL ONLY ON THE CD

MACHINE ELEMENTS	
<i>(Continued)</i>	
3241	Strength and Properties of Wire Rope
	Rope
3241	Wire Rope Construction
3243	Properties of Wire Rope
3244	Classes of Wire Rope
3245	Weights and Strengths
3249	Sizes and Strengths
3250	Factors of Safety
3251	Installing Wire Rope
3252	Drum and Reel Capacities
3253	Pressures for Drums and Sheaves
3253	Sheave and Drum Groove
	Dimensions
3254	Cutting and Seizing
3254	Maintenance
3254	Lubrication of Wire Rope
3255	Wire Rope Slings and Fittings
3255	Slings
3255	Wire Rope Fittings
3255	Applying Clips and Attaching Sockets
3257	Load Capacities

MACHINE ELEMENTS	
<i>(Continued)</i>	
3259	Crane Chain and Hooks
3259	Material for Crane Chains
3259	Strength of Chains
3259	Hoisting and Crane Chains
3259	Maximum Wear on a Link
3260	Safe Loads for Ropes and Chains
3261	Strength of Manila Rope
3263	Loads Lifted by Crane Chains
3264	Winding Drum Scores for Chain
3264	Sprocket Wheels for Link Chains
3266	Crane Hooks
3266	Making an Eye-splice
3267	Eye-bolts
3268	Eye Nuts and Lift Eyes
3269	Specifying Eyebolt Capacities
3269	Rigger's Capacity
3269	Engineering Capacity
3270	Miscellaneous Topics
3270	Nordberg Key
3270	Woodruff Keys
3270	Saddle Key
3270	Locomotive Development
3270	Percentages of Radial and Thrust Loads
3271	Roller Bearing
3271	Ball Bearing Lubrication
3272	Engine Governors
3273	Loaded or Weighted Fly-ball Governors
3273	Sensitiveness and Stability of Governors
3274	Shaft Governors
3274	Rope Splicing
